VAYO COMMUNE — Interactive Product Roadmap

This document outlines the step-by-step engineering roadmap for Vayo Commune, structured across **8 key development phases**. It transitions Vayo from a high-fidelity landing and waitlist page into an interactive, AI-driven offline social network.

Visual Roadmap Flowchart

The following flowchart shows the sequential progression of the phases and the exact modules required to build out each stage:

Phase Details & Technical Specifications

Here is the itemized breakdown of the roadmap, showcasing how they map to existing code and future implementation designs.

Phase 1 — Landing Website (Completed / Foundation)

Goal: Capture initial user interest and provide a premium presentation of Vayo Commune.

- **Premium Hero Section:** Mesh gradient backgrounds, glowing titles, and custom logo shimmer transitions. See [src/app/page.js] (file:///Users/chata/Desktop/Vayo_temp/src/app/page.js#L43-L85).
 - **Smooth Scrolling Experience:** Built-in scroll indicators and targeted smooth scrolling to features.
 - **Waitlist Form UI:** Geo-detection pre-selection, live phone verification, and custom loading indicators. See [src/app/join/page.js] (file:///Users/chata/Desktop/Vayo_temp/src/app/join/page.js).
 - **Responsive Layout:** Tailored styling configurations using Tailwind CSS v4 in [src/app/globals.css] (file:///Users/chata/Desktop/Vayo_temp/src/app/globals.css).
 - **Footer & Navigation:** Floating blur filters and quick contact linkages.
-

Phase 2 — Authentication

Goal: Turn waitlisted users into verified members with personalized preference profiles.

- **Login / Signup Pages:** Custom OAuth login interfaces (Google, Apple) and passwordless magic links.
 - **User Onboarding UI:** Seamless interactive slides where users configure profile cards.
 - **Interest Selection Screens:** visual tag selector where users pick categories (Outdoor, Cozy Dinners, Board Games, Sports).
 - **Profile Setup Flow:** Setup avatars, connect social networks, write bios, and verify phone numbers.
-

Phase 3 — Karma System

Goal: Incentivize community engagement and encourage high-quality, friendly behavior at events.

- **Karma Points UI:** Dashboard displays tracking positive user interactions, host reviews, and community milestones.
 - **Badge & Level System:** Badges ("Top Trekker", "Boardgame Guru", "Welcoming Host") that unlock special features as levels increase.
 - **Community Contribution Tracking:** Analytics monitoring events hosted, sports pitches reserved, or boardgames shared.
 - **Leaderboard Interface:** Monthly lists displaying top community stars to recognize verified hosts and helpful attendees.
-

Phase 4 — Community Discovery

Goal: Help members discover communities, local circles, and activity clusters they resonate with.

- **Community Cards:** Interactive cards showcasing member counts, primary vibes, and hosts.
 - **Search & Filters:** Search filters sorting by geographic radius, active times, and interest categories.
 - **Activity Recommendations:** Personal suggestions matched against the user's onboarding tags.
 - **Discovery Sections:** Curated groups (e.g., "Popular in Bangalore", "New Hikes This Week").
-

Phase 5 — Events & Real-World Meetups

Goal: Transition users offline by facilitating bookings, RSVPs, and calendars.

- **Event Pages:** Detail maps, timing, coordinator host profiles, and attendee list previews.
- **RSVP Interface:** Ticketing checkouts, reservation limits, and automatic waitlist queueing.
- **Meetup Cards:** Elegant, scrollable highlights showcasing upcoming event cards. Inspired by [src/components/EventShowcase.jsx]

(file:///Users/chata/Desktop/Vayo_temp/src/components/EventShowcase.jsx).

- **Calendar/Event UI:** Personal calendars showing upcoming reserved meetups, with one-click export (Google, Apple Calendars).
-

Phase 6 — Social Layer

Goal: Support chat communication and community feeds for post-event connections.

- **Feed UI:** Picture and text updates showing memories, reviews, and highlights from recent meetups.
 - **Messaging Interface:** Cohort chat rooms activating 24h prior to an event, allowing coordination.
 - **Notifications:** Push alerts for match alerts, chat rooms, and booking confirmations.
 - **Community Interaction Screens:** Photo sharing threads, poll questions, and host thank-you cards.
-

Phase 7 — AI & Smart Matching

Goal: Leverage smart suggestion engines to optimize match groups and recommend the best experiences.

- **AI Recommendation Interface:** Panels explaining recommendations (e.g., "Recommended because you enjoy cozy games").
 - **Match Suggestion UI:** Matching interfaces proposing small, chemistry-optimized cohorts (4–6 people).
 - **Personalized Experience Design:** Adapts dashboard categories in real-time based on the user's history and ratings.
-

Phase 8 — Premium Ecosystem

Goal: Establish monetization models and admin tools to scale operations.

- **Premium Membership UI:** Portal for premium subscriptions, early access RSVPs, and profile customization elements.

- **Admin Dashboard:** Oversight panel for host vetting, community reports, and waitlist approval.
- **Analytics Panels:** Event metrics, reservation show-up rates, active churn, and system speed.
- **Performance Optimization:** Edge routing, image optimization, dynamic page pre-rendering, and global caching.
